

# Antarctica Class Celebration

Another fantastic week of work to celebrate!

**Seb** has been doing lots of interesting things, such as cheese and yoghurt making, writing a chapter book and learning about how germs spread. Super!

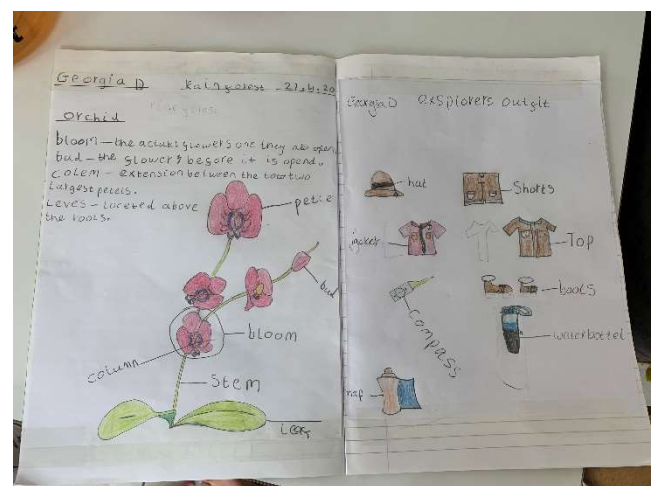

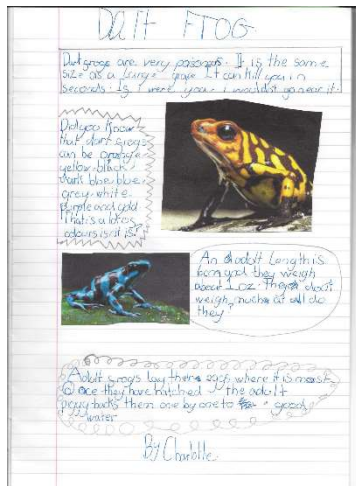

**Austin R** has classified rainforest animals, designed a backpack that you would need to survive in the rainforest and created a Powerpoint about Daintree rainforest in Australia.

**Liliya** has been really busy at home! She has written Tudor story, designed a poster about sea turtles, made Easter decorations, worked on her family tree and is keeping a journal.

**Erik** has been decorating Easter eggs for an Easter tree and is looking after the ducks.

**Charlotte** has been doing fantastic work on Maths with her Grandad, working on her English, planting a veg patch and growing seeds as well as growing a butterfly. She even had a birthday cookie, instead of a cake to celebrate her birthday! Have a look at her work.

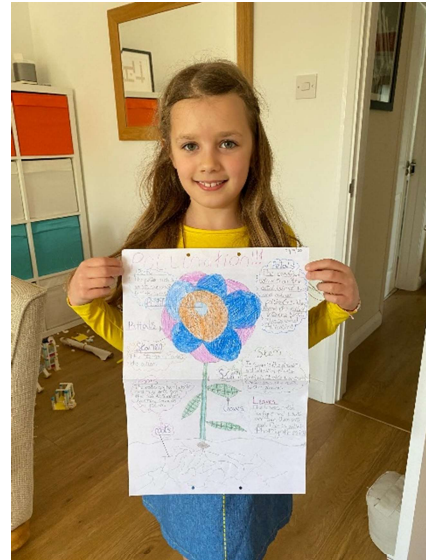

**Georgia** has designed a rainforest explorer's outfit, looked up rainforest key words and labelled the parts of a rainforest flower. Have a look above.

**Libby** has done some work on the rainforest layers, carried out a "cloud in a jar" science experiment, written a book review and used oil pastels to create her version of Rousseau's painting.

**Savannah** has made a Powerpoint to tell me all about her cool home learning. She has made a bow and arrow, a Henry VIII crown, is reading lots and doing Maths and English every day.

**Isla** has been learning how pollination happens in Science. She has also worked on calculating perimeter, using verbs and watched some David Attenborough documentaries.

**Elsie** has done some fabulous activities and learning. She has helped cook salmon en croute for the whole family, ran 5K, created a snow leopard fact file and worked on adding and subtracting fractions and written addition.

**William** has created a bar chart based on rainforest animals, with questions to match, has learnt about the layers of the rainforest and created some Pop art. Fab!

**Holly** has also researched a snow leopard, is working on her Maths and made a cool Tudor house out of lolly sticks as well as designing a Tudor banquet. Have a look!
